

Strategic Insights for Police Efficiency and Crime Prevention

i-three analytics are renowned for our expert, strategic and cost-effective analysis. Let our experienced advisors provide clarity and insight for rapid and actionable change.

For over 15 years, our multi-award winning insights have been used in more than 20% of UK forces, such as Kent and GMP, and been consistently praised by Chief Constables and Police and Crime Commissioners alike.

Supported by our unique, specially developed Analytics for Reduction of Crime (ARC) software, our expert and experienced professionals will interpret and explain insights powered by some of the most advanced and comprehensive data science analysis currently in use in UK policing. Our valued and thoughtful analysis offers:

- Cost-effective, independent insights for performance, strategy and commissioning
- Evaluation of funded interventions
- Strategic insights to build partnerships and shared working
- Rapid, detailed and clear reports for instant action on VAWG, Safer Streets, Serious Violence and local priorities
- Fast-tracked insight creation for rapid responses to the most complex questions

“Groundbreaking and will change the way this is done nationally”: Chief Constable Alan Pughsley

Let me say how impressed I am with the analyses. These are *VERY* important findings”: Professor Larry Sherman

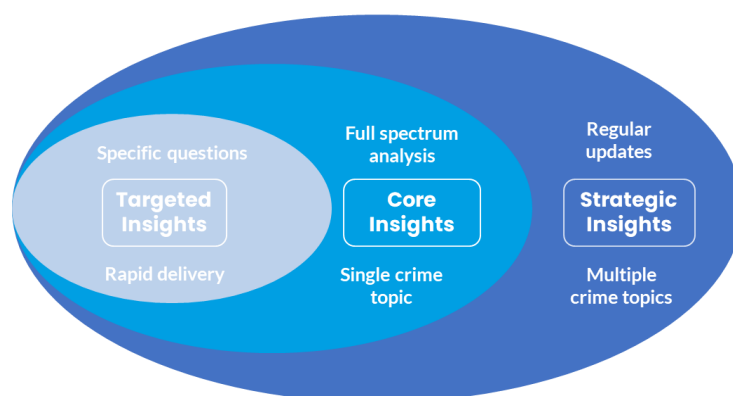

Answer questions such as:

- Have our interventions reduced demand, cut victim harm, and reduced costs?
- What will crime volumes be in 18 months time?
- Where are the key locations to target with partners?
- What factors are driving crime volumes, and how are patterns changing?
- What solutions will work best for each neighbourhood?
- How well are services configured to match demand efficiently and responsively?
- Is the force delivering the expected performance, and where are the change opportunities?
- Where, and when, can partners target effort for the greatest impact?
- What offender types are of greatest concern?

The i-three analytics strategic insight process

Your choice of Strategic Insight Option

Bronze: Targeted Insights

Specific questions answered at pace. Rapid turnaround for instant insight (£9,500).

Silver: Core Insights

Highly detailed analysis of your chosen crime topic. High quality impact and VfM evaluations (£24,500).

Gold: Strategic Insights

Premium offer for long-term analytical partnering. Flexible, bespoke, multi-topic analysis, with quarterly updates (£49,500)

Whether you need rapid answers to a focused question or a definitive strategic analysis service, the choice of insight option is both flexible and highly cost-effective. Proven automation and approved data security solutions deliver results for a fraction of the cost of traditional approaches and provide responsive results at pace.

We are so confident in our ability to reduce costs that we will happily defer payment for up to six months, allowing time for cashable savings time to accrue.

About i-three analytics

We have been supplying policing with strategic analysis for 15 years. Examples of our recent work include:

- Cheshire: Delivery of ARC system, live since 2024
- Lancashire Police: Award winning, Home Office funded research on Child to Parent DA Offenders
- ACE/ VIVACE: Homicide characterisation analytics
- Kent Police: Analysis for PCC VAWG strategy, sex offender analysis, Chief Constable innovation award
- Bedfordshire, Hertfordshire: Impact and VfM evaluation of DA intervention programmes
- GMCA: 10-year involvement, including sex offending analysis, DA, homicide, youth violence and serious violence analysis for force and Home Office policy development
- Kent, Essex and GMP: FCR operations analysis and Response Policing analysis
- Nottingham: Working with partners to evaluate schools-based violence reduction interventions

Our values are rooted in our public sector background whether working with PCCs to develop strategy and policy, or creating insights and evaluations for productivity and value for money. We are fully JOSCAR and Cyber Essentials registered, vetted and our services can be readily accessed through numerous compliant frameworks, including Bloom (Nepro3) and CCS Research and Insights.
