

# Carbon Reduction Plan

Supplier name: ...i-three Management Consulting Ltd.....

Publication date: ...01/04/2023.....

## Commitment to achieving Net Zero

i-three Management Consulting Ltd is committed to achieving Net Zero emissions by 2050.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 2019</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
Our baseline emissions footprint is calculated using government GHG conversion figures and formulae. Although we do not have turnover of over £5m and therefore no requirement to provide a carbon reduction plan, we choose to as part of our commitment to delivering the highest possible social and ethical standards. Baseline figures calculated retrospectively.	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b> Direct emissions from owned or controlled sources	<b>0</b>
<b>Scope 2</b> Indirect emissions from generation of purchased fuels: office electricity consumption fully green supply Gas consumption	0  0.07
<b>Scope 3</b> Upstream transportation and distribution	0.00 (no Transportation and distribution of

Waste generated in operations	products purchased applicable) 0.00 (no Disposal and treatment of waste generated)
Business travel	1.81
Employee commuting	0.00 (no commuting)
Downstream transportation and distribution	0.00 (No Transportation and distribution of products sold)
<b>Total Emissions</b>	<b>1.81</b>

### Current Emissions Reporting

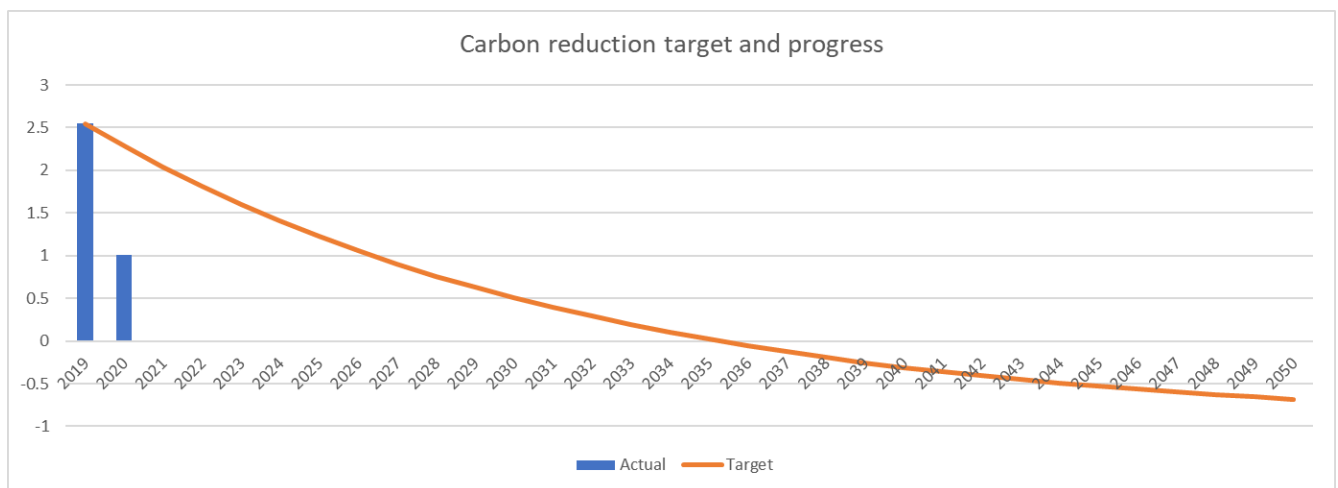

<b>Reporting Year: 2022</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b> Direct emissions from owned or controlled sources	<b>0</b>
<b>Scope 2</b> Indirect emissions from generation of purchased fuels: office electricity consumption fully green supply– actual billed KgCO <sub>2</sub> e Gas consumption– actual billed KgCO <sub>2</sub> e	0 0.07
<b>Scope 3</b> Upstream transportation and distribution  Waste generated in operations  Business travel Employee commuting	0.00 (no Transportation and distribution of products purchased applicable) 0.00 (no Disposal and treatment of waste generated) 0.56

Downstream transportation and distribution	0.00 (no commuting) 0.00 (no Transportation and distribution of products sold)
<b>Total Emissions</b>	<b>0.56</b>

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 0.67 tCO<sub>2</sub>e by 2027. This is a reduction of 68% from the 2019 figure.

Progress against these targets can be seen in the graph below:

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the previous 2019 baseline. The carbon emission reduction achieved by these schemes equate to 0.25 tCO<sub>2</sub>e, a 20% reduction against the 2019 baseline and the measures will be in effect when performing the contract.

- A partial change of business model, requiring less travel to customer sites for sales or delivery
- Where travel is necessary use of train only
- Using a green only electricity supplier (Octopus)

- Adoption of LED/PIR lighting controls
- Carbon neutral energy supply

In the future we hope to implement further measures such as:

- Extending the life of computer and other hardware
- Further reductions in printed materials
- Carbon offset and tree planting

## Declaration and Sign Off

This Carbon Reduction Plan has been *completed* in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### Signed on behalf of the i-three Management Consulting Ltd:
